

Maxim Shabunin

I am a beginner web developer . My journey in IT started in January 2023. I explored several areas, including Python and QA, but web development caught my attention the most! My main focus of learning has been on HTML, CSS, and JavaScript. I have also mastered the popular library React. There, I have showcased some personal projects that demonstrate my skills in web development.

I am seeking an opportunity to work in a dynamic team where I can contribute and continue my professional growth in the field of web development.

My Projects

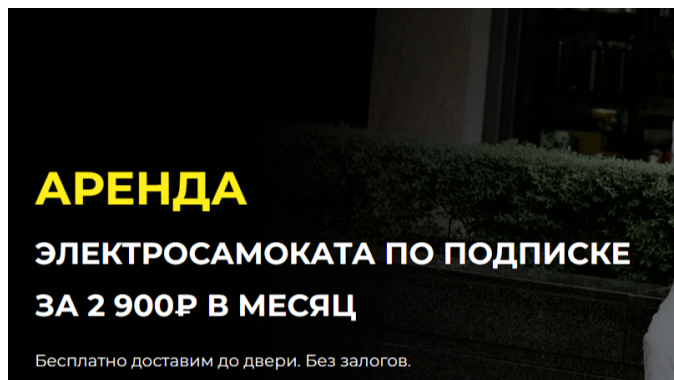

[HANGMAN GAME]

Start Game

Hangman Game

In this project, I aimed to beautifully implement a well-known game that is familiar to everyone. I chose to write it using native JavaScript, which allowed me to gain a deeper understanding of the language and its abilities. Additionally, I leveraged the power of Tailwind CSS to style the game and make it visually appealing.

Scooter Rental

This multi-page website is designed to provide services for renting electric scooters, bicycles, electric bicycles, exercise machines, and game consoles. It includes various functional features that ensure convenience for users.

In this project, I have implemented the following features:

- **CSS Animations:** I used CSS animations to create smooth and eye-catching transitions between different UI elements.
- **Responsive Design:** My project is fully responsive across various devices - from mobile phones to desktop computers.
- **Various JS Modules:** To add interactivity and functionality to the project, I used various JavaScript modules.

Soft Skills

- Communication
- Learnability
- Adaptability
- Organizational
- Critical thinking
- Good listening

Hobbies

- Play piano
- Football Freestyle
- Read books
- Hiking

Hard skills

 JavaScript

 HTML/CSS

 React

 Redux

 SASS/SCSS

 GIT

 TailWind

Design Tools

 Photoshop

 Figma

Languages

 Russian — Native or Bilingual

 English — Intermediate

Education

2015 - 2020

Krasnodar Polytechnical Institute
(now Kuban State Technological University)

Mechanical engineering
